Midwestern Workshop on Asymptotic Analysis

Indiana University-Purdue University Indianapolis, October 13 - 15th, 2023

The goal of MWAA is to facilitate interactions between mathematicians from the midwestern United States working in approximation theory, mathematical physics, potential theory, complex analysis, and related fields by bringing them together in an informal way for a two day workshop (preceded by a Friday Colloquium). A major objective is to expose attending graduate students to different areas of analysis.

The conference is partially funded by the National Science Foundation and we should be able to cover travel and lodging expenses. *Graduate students are encouraged to submit a poster.*

Speakers

Brett Wick (Washington University - St. Louis)

Victor Bailey (University of Oklahoma)

Elliot Blackstone (University of Michigan)

Len Bos (Università di Verona, Italy)

Robert Buckingham (University of Cincinnati)

Roozbeh Gharakhloo (University Of California, Santa Cruz)

Stéphanie Nivoche (Université Côte d'Azur, France)

Elodie Pozzi (Saint Louis University)

Tatyana Sorokina (Towson University)

Liz Vivas (the Ohio State University)

Shukun Wu (Indiana University)

Workshop is supported by

National Science Foundation
