

Midwestern Workshop on Asymptotic Analysis

Indiana University, Bloomington, October 11 - 13th, 2024

The goal of MWAA is to facilitate interactions between mathematicians from the midwestern United States working in approximation theory, mathematical physics, potential theory, complex analysis, and related fields by bringing them together in an informal way for a two day workshop (preceded by a Friday Colloquium). A major objective is to expose attending graduate students to different areas of analysis.

The conference is partially funded by the National Science Foundation and we should be able to cover local travel and lodging expenses. *Graduate students are encouraged to submit a poster.*

Speakers

Kelly Bickel (Bucknell University)

Adam Christopherson (Baylor University)

Carrie Clark (University of Illinois, Urbana-Champaign)

Christina Giannitsi (Vanderbilt University)

Lawford Hatcher (Indiana University, Bloomington)

Liudmyla Kryvonos (Vanderbilt University)

Vlassis Mastrantonis (University of Maryland)

Ryan Matzke (Vanderbilt University)

Nick McCleery (Purdue University)

Donggeun Ryou (Indiana University, Bloomington)

Ashley Zhang (Vanderbilt University)

Workshop is supported by

National Science Foundation
